## **DJORD TOVOS BACKSTORY**

Djord Tovos is the iron fist of the Tactical Observatory fleet for the Kerkag Empire. He relies on his subordinates for information, but the decision is his and his alone. He is a towering figure by human standards and strides with confidence through the dark halls of his ship. He is military through and through. His planning is immaculate and thorough. He will not be outworked and is vigilant in his attention.

Physically, he is near the apex of Kerkag physiology (3m, 368 kg) with a strong constitution.

Mentally, Djord is competent and capable. He has a good mix of learning and experience to draw on.

Emotionally, he's a model for the Kerkag ideal: Ruthless, Selfish, Detail Oriented, Accepting of novel ways of solving a problem and very, very well organized.
